PROFESSIONAL SUMMARY

Full-Stack Developer and AI/ML Engineer with hands-on experience building and deploying end-to-end software products.

Currently developing an AI-powered Earth Observation startup platform, taking ownership of frontend development, Java Spring Boot backend services, PostgreSQL, GPU-based AI integration, and production deployment.

Strong Python programming background with experience in machine learning, data processing, API integration, and relational database development.

Combines technical implementation with product ownership, including feature planning, UI/UX design, customer communication, deployment, and production maintenance.

TECHNICAL SKILLS

Programming Languages: Python, Java, JavaScript, TypeScript (Project Experience), C++, C#

Frontend Engineering: React.js, HTML5, CSS3, Responsive Design, State Management, Reusable Components, UI/UX Design

Backend Engineering: Java Spring Boot, Node.js, REST APIs, API Integration

Databases: PostgreSQL, MySQL, SQL, Relational Database Design

Cloud & Infrastructure: AWS S3, Docker, Kubernetes, Railway, CI/CD, Linux, Git

AI & Machine Learning: Python, TensorFlow, PyTorch, Computer Vision, Image Processing, GPU-Based AI Inference

AI Development Tools: Claude Code, OpenAI Codex, GitHub Copilot

Testing & Development: Jest, Postman, Git

PROFESSIONAL EXPERIENCE

AI/ML Engineer & Full-Stack Developer

Jun 2026 – Present

A.R.A.Z – Azercosmos Earth Observation Startup

Baku, Azerbaijan

- Built and deployed an end-to-end AI-powered satellite change-detection web platform, integrating frontend, backend, database, and GPU-based inference infrastructure.
- Developed and maintained frontend functionality, Java Spring Boot backend services, and a PostgreSQL database supporting the platform.
- Designed application workflows connecting user requests, backend services, database operations, and GPU-based image-processing pipelines.
- Integrated GPU-based AI processing with the web application, enabling users to request and access satellite change-detection results.
- Participated in feature planning, UI/UX design, and communication with users or customers to understand product requirements.
- Managed application deployment, maintenance, and production issue monitoring across the software stack.
- Developed satellite image-processing functionality, including super-resolution techniques supporting building-level change detection.

AI/ML Intern

Sep 2025 – Aug 2026

4SIM

Baku, Azerbaijan

- Developed AI-driven applications involving computer vision, natural language processing, and chatbots.
- Trained and fine-tuned deep learning models for practical applications, focusing on model accuracy and performance.
- Gained hands-on experience in model deployment and developed a computer vision solution for identifying workers.

SELECTED PROJECTS

Full-Stack E-Commerce Application

2024

- Developed a full-stack e-commerce application using React, Java Spring Boot, and MySQL.
- Implemented authentication, product filtering, shopping carts, wishlists, reviews, and order management.
- Used frontend state management to coordinate product states, shopping cart operations, and notification functionality.
- Integrated frontend components with backend APIs and database operations to support complete user workflows.

Satellite Image Retrieval Using Deep Learning

Graduation Project

- Designed a CNN-based content-based image retrieval system for satellite imagery.

- Implemented image preprocessing, feature extraction, and similarity measurement to retrieve relevant satellite images.

EDUCATION

Sabanci University

Sep 2022 – Jun 2026

Bachelor of Science in Computer Science and Engineering

Relevant Coursework:

Software Engineering, Database Systems, Data Structures and Algorithms, Operating Systems, Computer Networks, Machine Learning, Deep Learning, Human-Computer Interaction

ACHIEVEMENTS

- Hackathon Prize Winner (2026): Awarded USD 2,000 for developing and presenting a cheat-detection system.
- Awarded a fully funded scholarship by the Ministry of Education of Azerbaijan for academic excellence.

LANGUAGES

English (IELTS Academic 8), Azerbaijani, Turkish, Russian
